

ClearCool® 1100

Welded PVC Swing Door

Environmentally-Friendly Swing Door System

From new to retrofit applications, Thermoseal's **ClearCool® 1100** swing door systems combine the latest technology, premium materials and design features to exceed the demanding requirements of a refrigerated display case door. Available for face mount, the ClearCool® 1100 offers superior thermal performance with our fully-welded energy efficient PVC construction.

- Patented swing door system exceeds C-Specs requirements
- Designed to reduce condensation and energy consumption
- Manufactured for long lasting durability with welded PVC corners
- RoHS-compliant and completely recyclable

ClearCool® 1100

Welded PVC Swing Door Environmentally-Friendly Swing Door System

The **ClearCool® 1100** swing door is lighter-weight, more thermally-efficient, and requires significantly fewer parts than virtually all competitive product offerings - meaning the ClearCool® 1100 requires less energy to operate, and their production requires far fewer supply chain "links" to create a complete product.

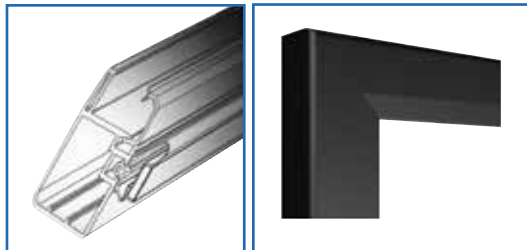

In addition, the ClearCool® 1100 offers replaceable glass, hardware and gasket components, meaning a new door is not required every time a component breaks or wears out - unlike many competitive products that are literally glued-together

FEATURES:

- State-of-the-art low-conductivity PVC resins for superior thermal performance.
- Welded PVC corners provide additional strength and rigidity for long lasting durability.
- Patented design reduces condensation and energy consumption.
- Field-replaceable wear components, including glass, hardware and gasket components.
- Magnetic gaskets ensure a positive seal and help to minimize energy loss.
- ANSI Z97.1 tempered glass for maximum safety.
- Standard color is black.

OPTIONS:

- Internal stiffeners engineered to minimize thermal conductivity.
- Self-closing feature.
- Multiple glass and solid panel configurations.
- Various hinge brackets.
- Additional magnetic and compression gaskets available.
- Other PVC colors available with sufficient volume.
