

ClearCool® 1500

Welded PVC Swing Door

Environmentally-Friendly Medium Temperature Swing Door System

The innovative design of the **ClearCool® 1500** not only offers the largest visible glass area of any framed door in the industry, but also features the narrowest mullion sightline of any framed glass door system on the market! This unique design offers maximum product visibility and makes it extremely energy efficient. The ClearCool® 1500 is ideal for high-humidity or lower temperature applications.

- Innovative door-to-door sealing requires no separate frame or mullions.
- Patent pending swing door offers superior thermal performance.
- Multiple configurations are possible with side-mounted door seals.
- Hinge mounted door is manufactured for long-lasting durability.
